

Security for yourself and your information.

In the Address Bar a secure web page begins with **https**

A lock picture will show to the right of the address or at the bottom of the page

If you are concerned about doing online payments or banking:

- Change your password every 3 to 6 months (ex. Of a strong password= bg#YtoK&U2 or 52gk3kds1dog)
- Use one credit card for online purchases only this way you can track your card and find problems quickly.
- Sign up for Paypal it is an excellent and very secure way to pay for transactions online. You can pay through them by credit card or directly through your bank account with them so they can keep your information safe.
