

## What is Java Script?

JavaScript is the most popular scripting language on the internet, and works in all major browsers, such as Internet Explorer, Firefox, Chrome, Opera, and Safari.

## What is JavaScript?

- JavaScript was designed to add interactivity to web (HTML) pages
- JavaScript is a scripting language
- A scripting language is a lightweight programming language
- JavaScript is usually in the coding (embedded) directly into web (HTML) pages
- JavaScript is an interpreted language (means that scripts execute without preliminary compilation)
- Everyone can use JavaScript without purchasing a license

Html – is a script or code that we use to create what you see on the internet. (Misty will show you some at a later date)
